

ChemFaces

We are professional high-purity natural products manufacturer

Natural Products Library

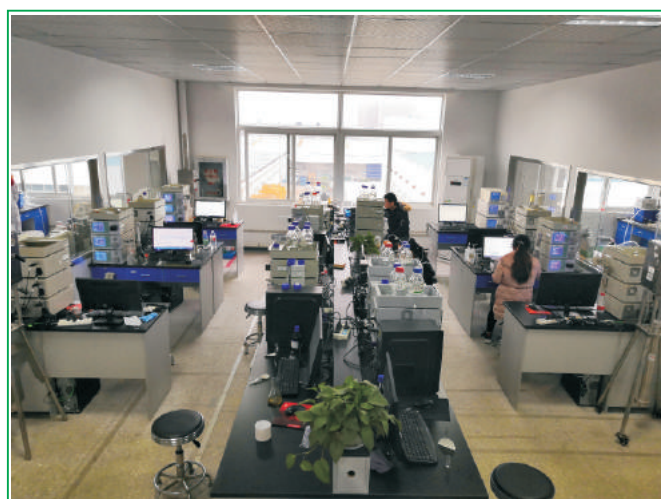

Company Profile

Welcome to ChemFaces, as the high-quality natural product research & development enterprise, we are committed to providing a variety of different specifications of natural products to worldwide scientific research institutions and enterprises.

ChemFaces is a professional company with expert and integrated R&D group and production team. The keen insights of the research personnel lay a solid foundation for the choice of plants with high research value and bioactivity. Screening the references, analyzing the expectant ingredients and designing the feasible production standard, the production staff can separate and prepare various natural products with different purity by making use of all kinds of preparative chromatographic apparatus and analytical instruments. Meanwhile, the research personnel can authenticate the structure of the compounds with spectrum, MS and NMR.

Covering an area of more than two thousands of square meters, ChemFaces was equipped with a systematic administrative area, including the office area, the sales office, R&D laboratory, precise instrument rooms, raw plant material warehouse, constant temperature and humidity warehouse and clean production workshop. The complete R&D and production process and normative management system provides a guarantee for the high quality products. With the impeccable sales system and abiding by the principle of meticulous service, we hammer at offering high-quality service for the customers around the world. By virtue of the independent import and export rights and years of experience in export trade, we can deliver the goods to you quickly by keeping you indoors.

Our Services

- Construct high-quality natural product library for drug research and development. More than 4000 compounds are available, many of them are our unique products.
- Provide reference substances and active components of Traditional Chinese Medicine.
- Provide more products of inhibitors in addition to a variety of screening libraries.
- Provide isolation and structure determination of natural products.
- Contract research, contract manufacture and process development services from lab scale, pilot scale to commercial scale.

Quality & Validation

ChemFaces Natural Products pay careful attention to the purity and stability our products. We can provide the chemical test data by NMR, LC-MS, and HPLC. If you are in any way unsatisfied with the quality of our products, we will unconditionally refund or replace the products in question.

Tech Support

ChemFaces helps our customers use the products to their full potential. Our team is dedicated to customer satisfaction and you can expect helpful advice on all aspects of our products when you Contact Us. (service@chemfaces.com)

Automation equipment

ChemFaces

focus on the production of

high-purity natural products and phytochemical reference materials.

In order to expand automated production, we have built a new standard factory of 2,300 square meters in 2018. And greatly improved the automation of production.

ChemFaces has its own complete natural product development platform, all of the R & D equipment are owned by itself, **rather than the "collaborative R & D public service platform" of government agencies.** So we have absolute autonomy.

New Products

ChemFaces is a professional high-purity natural products manufacturer, Our products are sold to research institutes, university laboratories, and research and development departments of enterprises and other scientific research units all of the world. Natural compounds have good biological activity, the scientists and scientific researchers use ChemFaces products found that most of the products have a very good research value and obtained very good scientific research results.

ChemFaces updates its product inventory every month, mainly with new additions and new batches. Because our products are unique for a long time. So we hope that our newly developed products can help the scientists and scientific researchers around the world. Due to the new products too much, and now a part of the product extracted to the site for scientists and scientific researchers reference.

For more information please refer to ChemFaces' official website (www.chemfaces.com).

Inventory & Packing

ChemFaces's compound library has more than 4000 different kinds of natural products for you to choose from. We provide separate packaging for various specifications and combination packaging for series compound. We can also provide custom packaging, such as the standard 96-well plates, 384 - well plates, etc.

ChemFaces is located in the Wuhan. Its product quality management system is certified with ISO 9001:2015 standards. The featured products are natural compound for life science research.

The Detection Department is responsible for managing the product quality control of all the natural products. All ChemFaces products are inspected by a three-level quality control system, including raw-material QC, semi-finished product QC, and end-product QC. We pay careful attention to the purity and stability of our products. We can provide the chemical test data by NMR, LC-MS, and HPLC.
